

Instructions for FRIXION

Dedicated FRIXION website : <http://www.frixion.jp/>

Do not use on official document, addresses or anything that should not be erased.

How to Use ●The ink colour will disappear when rubbed by the special rubber at the end of the pen body.

- Ink becomes transparent with frictional heat.
- No eraser residue.
- Erase and rewrite repeatedly.

Caution: Do not use on official document, addresses or anything that should not be erased.

●Do not expose to direct sunlight. ●Do not keep at the temperature over 60°C, or the ink will become colourless. ●At temperatures around -10°C or lower, the colour may recover and be visible again. ●Please do not use for writing on anything other than paper. ●Depending on the type of papers such as thermal paper or the characteristics of the printed paper, there could be cases where this erasure method cannot work properly. ●If rubbed by the rubber with stain, the surface of the paper would get dirty. Use the rubber after cleaning it off. ●Do not use on computer-scored answer sheets.
